

## Network Security Administrator

Salary range 2500 – 4000 EUR gross

### Your functions:

- Design, implementation and operation of modern network and security environments on hybrid public and private cloud infrastructures
- Planning and implementation of proof of concepts as part of the development of new network & security services
- Consistent automation of standard processes (Terraform, Ansible)
- Additional to cloud infrastructures in AWS and Azure, you will work with technologies such as Cisco's Nexus switches, firewalls from Fortinet and virtualized networks based on VMWare's NSX and SD-WAN products

### What we are looking for:

- Completed IT professional training and experience in Network and Firewall technologies and OSI layers 1-4
- Good knowledge of network and application protocols
- Good knowledge of dynamic routing over multiple redundant paths and dynamic load distribution as well as a high awareness of network security
- Joy of analyzing complex problems and solution orientation
- Experience with Azure or AWS or with Citrix' Netscalers is a plus
- Service orientation, ability to work in a team and enthusiasm about new technologies

### We offer:

- Inspiring working environment, high volume of interesting projects and possibility to work together with experienced senior team
- Start-up environment, where your voice matters, and your ideas are encouraged
- Highly competitive salary and bonus package, full health insurance
- Cool team building events and possibility to travel to Germany for trainings
- Flexible working hours, home office possibilities and 22 days of paid vacation
- Employee oriented working culture
