

TEST AUTOMATION ENGINEER

Salary range: 3000 – 4500 EUR gross

Your functions:

- As part of the QA team, you will take responsibility for the automated front-end tests of an IoT app project
- Write automated frontend tests
- Responsible for the test design, reporting and maintenance of the tests
- You are in close contact with the development team and the product owner
- You evaluate new tools and frameworks, by developing further our processes with the best practices

What we are looking for:

- Experience with test automation tools/frameworks
- You have essential programming skills
- You are familiar with Flutter, Git, CI/CD and project setups
- Knowledge of Flutter Driver for frontend test automation is a plus
- Nice to have practical experience in the environment of agile software development

We offer:

- Highly competitive salary and bonus package, full health insurance
- Work flexibly 100% in a home office, hybrid, a location of your choice, temporarily abroad or secure a workspace in one of our modern offices in Germany or Latvia
- 10% of your working time is available for your individual further training. Discover a variety of advanced training and exciting internal development opportunities.
- In addition, we equip you remotely: From notebook/Macbook, keyboard, headphones to desk and office chair
- Experience of a unique team spirit and a great freedom
